2019 TALL+URBAN INNOVATION CONFERENCE

Grand Hyatt Shenzhen, China
08-10 April

Featuring the 2019 CTBUH Awards Program

The annual CTBUH Tall + Urban Innovation Conference explores and celebrates the very best in innovative tall buildings, urban spaces, building technologies, and construction practices from around the world. Incorporating what was previously known as the CTBUH Annual Awards event, this three-day conference sees the owner/developers, design, and engineer teams for 50+ Awarded projects present in front of an international audience and live juries for winning distinctions across several award categories. The event brings to Shenzhen, one of the most dynamic cities in China, a critical cross-section of tall building owners, developers, occupiers, operators, designers, engineers, and builders – along with the interested public – to investigate the cutting-edge in sustainable urbanism, presented by the world's foremost examples.

About CTBUH

The Council on Tall Buildings and Urban Habitat (CTBUH) is the world's leading resource for professionals focused on the inception, design, construction, and operation of tall buildings and future cities. Founded in 1969 and headquartered at Chicago's historic Monroe Building, the CTBUH is a not-for-profit organization with an Asia Headquarters office at Tongji University, Shanghai; a Research Office at Iuav University, Venice, Italy; and an Academic Office at the Illinois Institute of Technology, Chicago. CTBUH facilitates the exchange of the latest knowledge available on tall buildings around the world through publications, research, events, working groups, web resources, and its extensive network of international representatives. The Council's research department is spearheading the investigation of the next generation of tall buildings by aiding original research on sustainability and key development issues. The Council's free database on tall buildings, The Skyscraper Center, is updated daily with detailed information, images, data, and news. The CTBUH also developed the international standards for measuring tall building height and is recognized as the arbiter for bestowing such designations as "The World's Tallest Building."

Council on Tall Buildings and Urban Habitat
